

Firefly

Single Person Hover Bike

A much wanted single person hover transporter among many hivers, the Firefly is an expensive bike and a rare sight on Scintilla. Its high-power turbine is of an older design and rough handling can sometimes give backdrafts in the combustion chambers, resulting in large and noisy flames from the exhaust. Ironically this has evolved to a much sought feature - especially among young men - and has given the bike it's distinct nickname "Firefly".....the original name has long been forgotten.
