

# Orb Barge

The Orb Barge is the workhorse in transorbital transport i.e. the transport of goods from the planet surface to the large interstellar vessels or spacestations that orbits the planet. This vessel is a typical vessels designed for this purpose although they a produced in many variants and sizes.

## Specifications

Class:	Jules TransOrb XIII
Type:	Small transport vessel
Size:	85 m (279 ft)
Displacement:	840 tons
Cargo:	4 TEU ( 600 tons)
Armaments:	None
Crew:	6
Passengers:	>10
Special:	Transorbital Capabilities
